## Terrestrial Bird Observation Form (Non-Nesting Obervations)

| | |
|---|---|
| **Surveyors:** | **Date:** |
| **Time:** | **GPS Coordinates/Azimuth:** |
| **Site:** | |

### Site Conditions

| | | |
|---|---|---|
| **Precipitation** (none, approx. in/hour) | **Air Temperature** (° F) | **Habitat Description (e.g. - alder thicket, cottonwood-willow):** |
| **% Cloud Cover:** 0=no clouds, 1=less than 50%, 2=50%, 3=more than 50%, 4=100% | **Wind:** 0=calm, 1=light breeze, 2=moderate breeze, 3=strong breeze, 4=too windy for survey | **Notes:** |

### Observations

| **Species Observed** | **Observer location along transect line** | **Distance from edge of water** | **Number of individuals** | **Detection status:** Singing (S), Calling (C), Visual (V), Drumming (D) | **Flyover Status**: F=Flying over or through site, FA=Flew away, FI=flew in, FS=Soaring | **Comments**: (include information such as sex, adults with food, mobbing behavior, pair interactions, nest building activity, feeding, resting and, predator avoidance) | **Other Observations:** Plant species the bird is in or under, foraging substrate, aerial display, etc. |
