Re: Cooper Lake Project (FERC No. 2170); Correction to revised schedule for providing comments on the Draft License Application

Cooper Lake Relicensing Participants:

In our recent letter we provided a revised schedule for review and comment of the Cooper Creek Instream Flow Study draft report and the Cooper Creek related portions of the Draft License Application (DLA). It has subsequently been pointed out to us that there was an error in the revised schedule as we described it in that letter: the DLA comments are due to Chugach no later than December 9 (not December 15). Thus, the correct revised schedule is as follows:

- Comments on the revised draft Instream Flow Study Report are due no later than October 31.
- Final Instream Flow report will be issued on or before November 15.
- Comments on Cooper Creek related aspects of the Draft License Application are due to Chugach no later than December 9.
- A formal meeting to address "substantive disputes" on the DLA will be held on December 15.

We apologize for any inconvenience the original error may have caused.

Sincerely,

Burke Wick, PE
Plant O&M Supervisor, and
Cooper Lake Relicensing Project Manager
