Nominated by: Nominating Committee
Incumbent: No
Declarations: None

Candidate Statement

There have been few times in our community's history where the criticality of reliable electrical power has been brought into such sharp focus as it is now. Would any of us relish the thought of weathering this pandemic without the benefit of reliable, dependable, cost-effective power to our homes and businesses?

I am running for the Chugach Electric Association [CEA] Board because I have been engaged in Railbelt power issues for many years and now more than ever, I clearly understand the importance of dependable power to our community. I am running for the CEA Board because I want to bring my expertise and experience to the board's process of managing our cooperative such that it becomes a stronger, more resilient, and more efficient enterprise. And with my prior service as an MLP Advisory Commissioner, MLP Board Chair, and my previous participation with CEA and the other utilities on Railbelt power issues, I am running for the CEA Board because I have something uniquely valuable to offer. I already understand the issues confronting CEA on Railbelt power generation and transmission.

I appreciate your confidence and your vote.
