

Time of Use applications are now open

Applications are now open for Chugach's Time of Use Pilot Program. The initial application period runs through November 30. The program offers eligible residential and small general service members lower energy prices during off-peak hours (9 pm – 9 am) and higher prices during peak demand periods (9 am – 9 pm). Members can use the personalized Compare My Rate tool to estimate how their historical energy charges would have compared under the Time of Use rate before deciding whether to apply.

The tool and application are available through My Account on the Chugach website: myaccount.chugachelectric.com. Participation is limited to 500 residential and 500 small commercial members. If applications exceed available spaces, eligible applicants will be selected through a random lottery. Applications received after November 30 will continue to be accepted and will be placed on a waitlist in the order received. Visit www.chugachelectric.com/TOU to learn more.

Volunteer opportunities: help shape Chugach's future

Looking for a meaningful way to get involved at your electric cooperative? Chugach Electric is seeking members to serve on its 2027 Bylaws, Election, and Nominating Committees, as well as the Member Advisory Council (MAC). Committee volunteers have a direct opportunity to contribute ideas, support the cooperative's democratic process, and help guide decisions that affect members. The Chugach Annual Meeting is scheduled for Friday, May 21, 2027, beginning at 4 pm at ChangePoint Alaska.

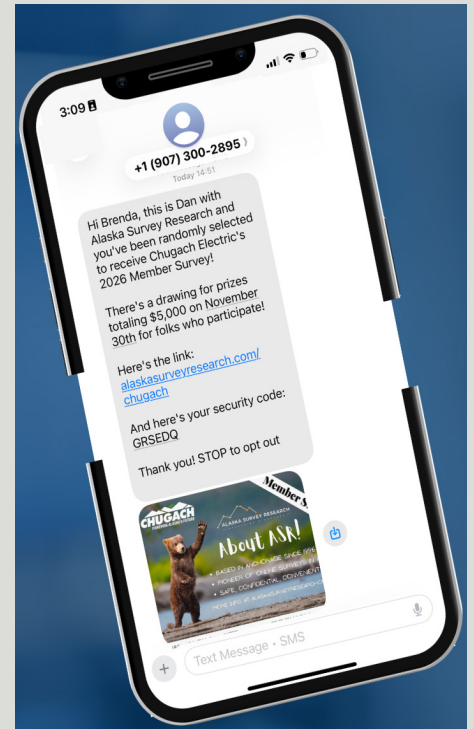

- **Bylaws Committee:** reviews bylaws and considers recommended revisions
- **Election Committee:** responsible for ensuring a fair election
- **Nominating Committee:** seeks qualified board candidates and screens potential nominees
- **Member Advisory Council (MAC):** advises the board as an ad hoc committee on issues impacting the cooperative

(See Committees, page 2)

Coming soon: Annual member survey

Chugach is gearing up for its annual member survey. Each year, we use a professional company to randomly survey hundreds of our members on price, reliability, and service. This year we are working with Alaska Survey Research to conduct a text-to-web survey.

Keep an eye out in mid-November, as you may get the survey and be asked for your response. {1200232}

Ready to participate?

Applications are available at www.chugachelectric.com/annual-meeting. Completed applications must be received by 5 pm on Thursday, Nov. 5. For more

information, call (907) 762-4489.

Your cooperative thrives when members get involved. Consider lending your voice and expertise by serving on a committee in 2027. {191344028}

Join us for Efficient Fridays

Celebrate Energy Awareness Month and National Cooperative Month with Chugach during Efficient Fridays! Stop by the Chugach lobby at 5601 Electron Drive every Friday in October from 11 am to 1 pm to learn more about energy, your electric cooperative and programs available to members.

Each Friday will feature a different topic:

- October 2: Member Programs
- October 9: Electric Vehicles

- October 16: Your Electric Cooperative
- October 23: Energy Efficiency
- October 30: Heat Pumps

Stop by, ask questions, pick up helpful information, and enter for a chance to win a prize!

In the community: Planting roots for the future at Baxter Elementary

Baxter Elementary fifth graders rolled up their sleeves and joined Chugach and partner Carlos Tree Service to plant an apple tree at the school. Chugach has been a Tree Line USA utility since 1999, planting a tree at a different elementary school each year as part of our commitment to give back to the community and educate members.

CHUGACH EMPLOYEE SPOTLIGHT

From Engineering to Operations to Member Services, all of Chugach's roughly 450 employees live and work in Alaska.

Each month we introduce you to one of our employees who works every day to provide safe, reliable power to our members.

Name: Lonnie Young
Position: Power Dispatcher
Time at Chugach: 6 years

Lonnie says his proudest accomplishment at work has been obtaining his Professional Engineering license. It is a credential that reflects both technical depth and persistence.

As temperatures cool and the days get shorter, knowing how much energy your devices use can help identify energy hogs and vampire loads that are costing you

money. Stop by our office to borrow a Kill-A-Watt meter, an energy monitoring tool that allows you to measure consumption of your devices.
