

ELECTRONICALLY FILED WITH RCA

June 30, 2025

Regulatory Commission of Alaska
701 W. 8th Avenue, Suite 300
Anchorage, Alaska 99501

Subject: Tariff Advice No. 574-8; Chugach Electric Association, Inc.'s Cost of Power Rate Adjustment Factors for Rates Effective Third Quarter, 2025

Commissioners:

The tariff filing described below is transmitted to you for filing in compliance with the Alaska Public Utilities Regulatory Act and Sections 3 AAC 48.200 – 3 AAC 48.442 of the Alaska Administrative Code. The purpose of this filing is to adjust Chugach Electric Association, Inc.'s (Chugach) cost of power adjustment (COPA) factors, and non-firm purchased power rates for qualified cogeneration and small power production facilities for rates effective July 1, 2025. Also included in this filing is the proposed adjustment for the Beluga River Unit (BRU) Contributed Capital surcharge for South District members, and the BRU Contributed Capital rebate for North District members for rates effective July 1, 2025.

<u>TARIFF SHEET NUMBER</u>		<u>CANCELS SHEET NUMBER</u>		<u>SCHEDULE OR RULE NUMBER</u>

97.6.2	9th Revision	97.6.2	8th Revision	Adjustment Factors

This filing is not for a new service, will not result in the termination of an existing service, conflict with any other schedule or rate contained in Chugach's operating tariff, or in any other way adversely impact customers or the public. Chugach provides electric service to approximately 90,000 retail members with 113,000 retail metered locations and one wholesale customer, the City of Seward d/b/a Seward Electric

System (Seward). Chugach is projecting annual revenues of approximately \$392.2 million for the calendar year 2025.

Summary of Results

With the implementation of the rate changes proposed in this filing, the monthly bill for residential members using 525 kWh in the South District will increase by approximately 0.7 percent, or from \$136.73 to \$137.69, and the total monthly bill for residential members in the North District will increase approximately 0.3 percent, or from \$113.81 to \$114.21.

The total bill adjustments are primarily attributed to the BRU Contributed Capital surcharge and rebate rate factor adjustments. The North District BRU Contributed Capital rebate has been adjusted from (\$0.03034) to (\$0.02950) per kWh. This increase is primarily attributed to a reduction in the North District balancing account. The South District BRU Contributed Capital surcharge is increasing from \$0.01332 to \$0.01521 per kWh, which is largely due to a reduction in the balancing account.

The proposed retail and wholesale third quarter, 2025, COPA factors and BRU Contributed Capital surcharge and rebate, are summarized in Table 1 below.

Table 1: North and South District Rate Factors, Third Quarter 2025 (\$/kWh)			
District / Service	COPA Rate	BRU Contributed Capital	Total
South District			
Secondary Service	\$0.06584	\$0.01521	\$0.08105
Primary Service	\$0.06536	\$0.01521	\$0.08057
Seward (G&T)	\$0.06441	\$0.01521	\$0.07962
North District			
Secondary Service	\$0.06584	(\$0.02950)	\$0.03634
Primary Service	\$0.06536	(\$0.02950)	\$0.03586

Chugach's proposed rate for non-firm purchases from qualified facilities that have a nameplate capacity of 200 kW or less is \$0.06158 per kWh at transmission voltage, \$0.06260 per kWh at distribution primary voltage, and \$0.06307 per kWh at distribution secondary voltage.

During first quarter 2025, gas from Chugach's ownership interest in the BRU was not used for economy sales, and Chugach does not expect such sales will be made in 2025. In compliance with Letter Order No. L2100172, Chugach confirms that the volumes of natural gas used for economy energy sales during first quarter 2025, would have been determined by the average hourly heat rate of the least efficient power plant operating at the time to generate energy used in the transaction, although no such sales were made.

Natural Gas Supply

Table 2 below summarizes Chugach's second quarter 2025 and third quarter 2025 natural gas purchase prices (firm requirements) from Hilcorp Alaska, LLC and from Chugach's ownership interest in the BRU. The BRU Gas Transfer Prices (GTP) for second quarter 2025, and third quarter 2025 were based on Chugach's GTP as filed in Tariff Advice No. 566-8¹.

¹ Tariff Advice Nos. 566-8 was approved by the Commission in Letter Order No. L2500089 effective April 1, 2025

Table 2: Summary of Chugach Natural Gas Supply Prices (\$/Mcf)			
Gas Supplier	Contract	Q2 2025	Q3 2025
Hilcorp Alaska, LLC (1/1/2015 – 3/31/2028)	Firm	\$7.86	\$7.86
Chugach Electric Association, Inc. – BRU	Owned	\$6.65	\$6.65

Natural Gas Storage

Chugach’s gas storage activity is provided on Exhibit 15, which presents the volumetric (Mcf) activity for the 18-month period ending March 31, 2025. As of March 31, 2025, the volume of gas in storage totaled 1,575,940 Mcf at a value of \$12,908,350 for an average weighted price of \$8.19 per Mcf.

2025 Exchange Agreement with Marathon Petroleum Company, LP

On May 1, 2025, Chugach and Marathon Petroleum Company, LP (MPC) entered into an agreement structured to exchange and return gas over a six-year term from May 1, 2025 through March 31, 2031 (Exchange Agreement). The Exchange Agreement was submitted to the Commission through an informational filing on May 12, 2025. This Exchange Agreement is part of Chugach’s ongoing efforts to maximize the use of its firm gas supply resources and mitigate potential gas shortfalls beginning in 2028.

From a ratemaking perspective, Chugach will ensure that today’s ratepayers, as well as future ratepayers, are not negatively impacted by the exchange transactions. Any variance between the \$9 per Mcf fuel component and the highest cost gas on the system will be accumulated, deferred, and used for the benefit of future ratepayers when purchasing the exchanged gas during the return period. This price provides Chugach with operational flexibility and financial simplicity to source and value the gas exchanged, while assuring current members’ cost of gas does not increase. Chugach will include a schedule of exchange transactions in its second quarter 2025 COPA filing. This new COPA exhibit will summarize exchange transactions, value the gas being utilized, and track accumulated and deferred fuel revenues.

Explanation of Tariff Sheets

The following tariff sheets reflect the proposed rate changes contained in this filing.

Tariff Sheet Nos. 94, 94.04, and 94.05: These tariff sheets present itemized fuel and purchased power costs and projected MWh sales to arrive at the cost per kWh sold at the generation and transmission level.

Tariff Sheet Nos. 94.1 and 94.1.1: These tariff sheets establish the Chugach retail fuel and purchased power recovery rates by adjusting the retail generation and transmission rate (calculated on Sheet Nos. 94, 94.04, and 94.05) to reflect recovery levels from primary and secondary voltage deliveries at the distribution level.

Tariff Sheet No. 94.1.2: This tariff sheet provides a summary of the fuel, purchased power, Fire Island Wind renewable energy factor, and BRU Contributed Capital surcharge and rebate rates for the South and North Districts at primary and secondary delivery.

Tariff Sheet No. 96: This tariff sheet contains the BRU Contributed Capital surcharge for South District members and the BRU Contributed Capital rebate for North District members.

Tariff Sheet No. 97: This tariff sheet reflects updated non-firm power rates for cogenerators and small power producers. The fuel and purchased power expense on line 1 is the sum of total fuel and purchased power expense, less economy fuel costs, as reflected on Sheet Nos. 94, 94.04, and 94.05.

Tariff Sheet No. 97.1.5: This tariff sheet is a continuation of Sheet Nos. 97.1, 97.1.1, 97.1.2, 97.1.3, and 97.1.4. These sheets provide a history of Chugach's COPA factors at transmission delivery from July 1, 1987 (inception date of the current tariff) through the rates currently proposed. The post-acquisition history has been added to this sheet and a new line has been added to include the rates for fuel, purchased power, and the Fire Island Wind renewable energy factor, for retail customers.

Tariff Sheet No. 97.5.3: This tariff sheet is a continuation of Sheet Nos. 97.5, 97.5.1, and 97.5.2. These sheets provide a history of Chugach's COPA rates for delivery at primary voltage levels. The post-acquisition history has been added to this sheet and a new line has been added to include the rates for fuel, purchased power, and the Fire Island Wind renewable energy factor, for primary service customers.

Tariff Sheet No. 97.6.2: This tariff sheet is a continuation of Sheet Nos. 97.5, 97.6, and 97.6.1. These sheets provide a history of Chugach's COPA rates for delivery at secondary voltage levels. The post-acquisition history has been added to this sheet and a new line has been added to include the rates for fuel, purchased power, and the Fire Island Wind renewable energy factor, for secondary service customers.

Supporting Exhibits and Attachments

The following exhibits and attachments support the development of the fuel, purchased power, and avoided cost rates contained in this filing:

Exhibit 1 presents projected energy sales, generation and purchase power requirements to meet the sales forecast for third quarter 2025. These projections are based on recent cost and line loss results.

Exhibit 2 presents energy sales by District and rate class for the past four quarters. The average retail line loss factor is also calculated on this exhibit.

Exhibit 3 presents MWh generation for each of Chugach's generation units and energy purchases for the past four quarters. Station service and economy energy sales have been deducted to arrive at net generation and purchases.

Exhibit 4 presents quantities of gas used at each of Chugach's generation plants for the past four quarters.

Exhibit 5 summarizes actual first quarter 2025 economy energy sales, wheeling transactions, power pool transactions, and other cost of power credits.

Exhibit 6 summarizes actual first quarter 2025 fuel and purchased power cost transactions.

Exhibit 7 summarizes actual first quarter 2025 and projected balancing accounts through second quarter 2025, on a customer class basis.

Exhibits 8 through 10 summarize the allocation of monthly fuel and purchased power costs and the cost of power adjustment balancing account impacts to each customer class. These amounts are also shown on Exhibit 7.

Exhibit 11 summarizes the quarterly balancing account impacts from fuel and purchased power costs and credits for the retail and wholesale classes on an actual basis.

Exhibit 12 summarizes natural gas used at each power plant by fuel contract on both an actual and projected basis.

Exhibit 13 presents the BRU Contributed Capital surcharge for South District members and the BRU Contributed Capital rebate for North District members.

Exhibit 14 presents the MWh delivered, curtailed, and delivered from Fire Island Wind, LLC, for the previous 12-month period.

Exhibit 15 presents the summarized monthly gas volumes in storage, gas transactions for firm and interruptible storage service, gas exchanges, and the weighted average cost of gas in storage for the previous 18-month period.

Attachment A contains supporting invoices for economy energy sales, wheeling transactions, water sales invoices, power pool invoices and exchange transactions for the past quarter. Ammonia invoices, used in the calculation of cogeneration buyback rates, are also included in this attachment.

Attachments B through D contain supporting invoices for each month of the quarter for natural gas, gas transportation, and purchased power costs.

Attachment E contains the detailed calculations of the avoided costs on an hourly basis and summarizes the difference between the average quarterly rates charged to customers under Tariff Sheet No. 97 against the calculated hourly avoided costs. Any variance will be captured in the next quarterly filing.

Please contact David Caye, Manager, Regulatory Affairs at (907) 762-4842 or david_caye@chugachelectric.com if additional information is needed.

45th Revision Sheet No. 96

Chugach Electric Association, Inc.

Beluga River Unit Contributed Capital Surcharge and Rebate

The Beluga River Unit Contributed Capital (BRU Contributed Capital) adjustment process governs the collection of funds through a surcharge assessed to South District members and the disbursement of funds to North District members through a rebate over a targeted 120-month period, beginning January 1, 2021.¹ The BRU Contributed Capital adjustment mechanism reconciles historical contributions and future ratepayer benefit between members served in the South District and North District in the amount of \$176,612,912, or \$136,002,239 on a present value basis (10 years, 5% interest rate).

BRU Contributed Capital surcharge and rebate amounts are adjusted quarterly consistent with the timing of Chugach's cost of power adjustment filings. Because the surcharge and rebate amounts are determined by projected sales and incorporate balancing accounts, the actual life of the BRU Contributed Capital adjustment process may be shorter or longer than the 120-month period.

A. Applicability

The surcharge is applicable to all South District members and the rebate is applicable to all North District members.

B. BRU Contributed Capital Balancing Accounts

Chugach shall maintain a BRU Contributed Capital surcharge balancing account for South District members and a BRU Contributed Capital rebate balancing account for North District members. The South District balancing account starts with a debit balance of \$176,612,912 reflecting the amounts due from the South District members. The North District balancing account starts with a credit balance of \$176,612,912 reflecting the amount to be rebated. Each account will be reduced monthly by the amount of the surcharge collected and rebate returned to the members.

C. Surcharge and Rebate Amounts

Member billings will be adjusted on a quarterly basis to reflect changes in surcharge and rebate amounts.

South District BRU Contributed Capital Surcharge:	\$0.01521 per kWh	I
North District BRU Contributed Capital Rebate:	(\$0.02950) per kWh	I

160th Revision Sheet No. 97

Chugach Electric Association, Inc.

**POST ACQUISITION PURCHASE AND SALES RATES FOR QUALIFIED COGENERATION,
SMALL POWER PRODUCTION, AND STANDBY/BUYBACK FACILITIES**

Available in all territory served by Chugach, or as required pursuant to contractual arrangements under wholesale power sales agreement. Applicable to qualified cogeneration, small power production and standby/buyback facilities of 200 kW or less. The type of service shall be single or three phase 60 hertz at Chugach's standard voltages.

Chugach reserves the right to limit the number of retail customers receiving service under the terms of this schedule to one per substation circuit. Chugach further reserves the right to reduce the buyback rates for costs associated with the integration of the energy produced by the qualifying facility into the Chugach system. Integration costs are project specific and determined through the completion of an integration study completed by Chugach.

Monthly Rates

Power sales supplied by Chugach to the customer to meet its electric requirements will be priced at the applicable rates. The rate paid by Chugach to the customer for kWh supplied by the customer to Chugach is the average avoided cost calculated as follows:

1. Fuel and purchased power expense, excluding Bradley Lake and Fire Island Wind, predicted for next quarter in the determination of fuel and purchased power rates.	\$21,366,258	
2. Non-fuel O&M expense	\$199,436	
3. Balancing Account as of March 31, 2025	(\$96,573)	
4. Total Avoided Cost Included in Rate	\$21,469,122	
5. kWh Sales at G&T predicted for next quarter:	348,647,368	
6. Avoided Cost per kWh at G&T (L4 / L5)	<u>\$0.06158</u>	I
7. Avoided Cost at Retail Primary Voltage		
a) Retail Primary kWh Sales at G&T	64,118,124	
(Percent Primary Distribution Losses at G&T: 1.64%)		
b) Retail Primary kWh Sales at Delivery	63,069,702	
c) Avoided Costs per kWh at Retail Primary (L6 x L7a / L7b)	<u>\$0.06260</u>	I
8. Avoided Cost at Retail Secondary Voltage		
a) Retail Secondary kWh Sales at G&T	385,974,256	
(Percent Secondary Distribution Losses at G&T: 2.37%)		
b) Retail Secondary kWh Sales at Delivery	376,835,259	
c) Avoided Costs per kWh at Retail Secondary (L6 x L8a / L8b)	<u>\$0.06307</u>	I

These rates will change concurrently with cost of power factor adjustments and general rate revisions.
